WINDOW & DOOR SEAL

WINDOW & DOOR SEAL

The Professional Sealing System for Any Structure

Eliminate Window Leaks!

The perfect seal around windows, doors and structural seams...seals out moisture, noise, air and insects. Economical...prevents costly callbacks.

Easy to Apply!

It's a snap: Unroll and cut to length, remove the release paper, press into place over window or door flanges...seal with a hand roller...and you're done! Won't crack, dry out or lose adhesion when properly applied.

Made to Last!

Made of a durable, multilayered film coated with a strong, very adhesive rubberized asphalt, the aluminum outer surface resists UV degradation for up to 180 days! Bottom line: Plyco Window & Door Seal is the obvious choice for all construction.

Proven Performance!

In use on thousands of residential, commercial and industrial buildings across the U.S.
